

“Nowadays children as young as ten are committing terrible crimes such as murder and rape. If children commit such crimes age is no excuse and they should be sent to prison for the rest of their lives.

Do you agree?”

Decreasing the age of committing crimes is a new phenomenon which governments are faced ~~with to them~~ in developing countries. In the past criminals who killed a person ~~were~~ sent to a jail for the rest of their lives, but for children who commit murder ~~it seems not to~~ be fair. ~~Although, Although~~ the age is not ~~an~~ excuse for ~~happening~~ such terrible crimes ~~happening~~, it is important to find ~~the a~~ main reason that makes a child ~~as~~ a murderer or ~~a rapist /~~ raper.

Sociologists believe that family and society are the main ~~ones~~ responsible for making children commit crimes and it is necessary to help these kinds of families train their children not to ~~go in the wrong way or in a wrong way~~. In these families parents are usually addicted and do not spend time for their children and instead, they use their children for making money, ~~so~~ ~~So~~ by the solution that sociologists give to governments, they not only ~~do~~ help the family escape the ~~cycle circle~~ of crime, but also they decrease ~~the~~ number of crimes which children commit.

In spite of all that, if a child commits a crime, ~~we~~ should face him by ~~law low~~ but it is not ~~acceptable legal~~ to send him to ~~a~~ prison ~~where which~~ all kinds of criminals ~~exist in it~~. In my opinion, it is essential for governments to have a special jail for children where ~~they~~ can teach them to work and live without crimes and prepare them for their rest of their lives. Also, governments can give them a vocation ~~in~~ ~~which case which in this case~~, these children not only ~~do~~ work and earn money for their lives, but also they feel useful for their society.~~s~~
